

## Product Specification 7278

Taconic 7278 is a standard 27 mil PTFE coated fiberglass fabric. This material exhibits release properties, heat resistance, and chemical resistance. This material is designed to be a strong fabric with high tear strength and structurally sound to prevent distortion. Common applications include tray lining, wear stripping, and gaskets and seals. The fabric is often used in presses for automotive applications. Maximum width is 181" wide.
