

Product Specification 7202

Taconic's 7202 is a silicone coated glass fibre product with high friction and release properties which offers excellent value and performance across a wide variety of industrial applications. With its abrasion and flex resistant surface, excellent chemical resistance, superior dielectric and release properties, 7202 is used as a high friction conveyor belt and electrical insulator in many industries and also as a curtain material in packaging applications. Standard width of 7202 is 975mm, with colour availability in red or white.

Product Properties	Units	Value	Tolerance	Test Method
Reinforcing Substrate		E-GLASS		
Coating Type		SILICONE RUBBER		
% Coating	%	46		ISO 2286-2
Total Coated Weight	g/m2	750	+/- 5%	ISO 2286-2
Nominal Thickness	mm	515		ISO 2286-3
Tensile Strength	%	3200	Typical Warp	ISO 1421
		2300	Minimum Warp	
		N/A	Typical weft	
		N/A	Minimum weft	
Colour		White		
Rubber Hardness		69		
Operating Temperature	°Celsius	-73° to +230°
